

JACKSON MWANIKI MUNENE

Digital Marketing Specialist & Application Developer

Kenya | +254 742 881 370 | jacmwaniki@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

Digital marketer and application developer with hands on experience running social media and brand content for hospitality businesses, alongside designing and building the software those businesses actually run on. Founded NexInk, an independent practice combining marketing strategy with custom booking, POS and feedback platforms for small and medium businesses in Kenya. Comfortable owning a project end to end, from strategy and content through to a live, working web application. Holds a Bachelor of Science in Applied Technology and a Data Science certificate.

SKILLS

- Digital marketing: social media strategy and content, Meta Ads Manager, Metricool, content calendars, brand and campaign design
- Design and video: Adobe Creative Suite, Canva, CapCut, in-venue signage and print collateral
- Development: JavaScript, HTML/CSS, Python, Next.js, low code app building with Zoho Creator
- Business systems: Zoho CRM, Zoho Creator, Odoo, WordPress

EXPERIENCE

Digital Marketing & Content Manager

Feb 2025 – Present

Hunters Paradise Group, Kenya

- Independently manage social media and content for both properties, from planning and shooting content through to scheduling and reporting in Metricool
- Design and maintain all guest facing graphics across the properties, including menus, table talkers, promotional offers and content displayed on in venue screens
- Designed and built the Ekwena Feedback System, a full stack, role based guest feedback platform live across two branches and four outlets: a mobile guest feedback flow, PIN based staff logins for a fifteen person roster, and a manager dashboard with NPS scoring, staff leaderboards and automatic low score flagging, replacing paid survey software (Next.js, Supabase, Tailwind CSS)

Founder, Digital Strategy & Software Development

Apr 2026 – Present

Independent practice, Kenya

- Run an independent practice delivering social media strategy and custom software for small and medium businesses in Kenya, including Coffee Garden Suites
- Repositioned a boutique hospitality client's Instagram into a direct booking channel using a structured content and caption framework
- Design and build software products for hospitality and retail clients, including a multi property booking manager and a point of sale platform, using React, TypeScript, Supabase and Firebase
- Publish daily applied marketing strategy writing for Kenyan businesses on Substack

Zoho Solutions Consultant

Jun 2023 – Dec 2023

Nairobi, Kenya

- Resold and customized Zoho suite applications, primarily Zoho Creator and Zoho CRM, tailoring each build to the workflow of the client business
- Designed and built a doctor appointment booking system on Zoho Creator for a healthcare client
- Designed and built a laundry management application on Zoho Creator for a business operating across multiple branches

SELECTED BUILDS

Live products built and maintained independently. Full case studies and demos at the portfolio link above.

- NexBookings — booking manager for hotels, Airbnbs and guest houses in Kenya, covering properties, rooms, bookings and payments (React, TypeScript, Supabase)
- Manguo POS — point of sale system for Kenyan retail shops, covering product variants, credit accounts and staff PIN access (React, Firebase)
- Shift Management App — browser based shift scheduling for hospitality teams, aware of Kenyan public holidays and leave accrual (React, TypeScript)

EDUCATION

Bachelor of Science, Applied Technology — United States International University – Africa (USIU-Africa), 2023

Certificate in Data Science — Moringa School, 2024
